Dana Whitfield

Austin, TX 78701
(512) 555-0188 * dana.whitfield@example.com * https://github.com/danawhitfield

Objective
Data engineer moving into platform work. Looking for a team that treats data pipelines as production software.

Core Competencies
Python, Scala, Apache Spark, Airflow, dbt, Snowflake, BigQuery, Terraform, Google Cloud Platform, Looker, Tableau, Pandas, NumPy, scikit-learn

Professional Experience
Data Engineer II, Brightline Analytics - Austin, TX 2021 - Present
- Rebuilt the ingestion layer on Spark Structured Streaming, raising throughput from 40k to 310k events per second.
- Introduced dbt and cut the analytics team's model build time by 70%.
- On-call rotation owner for 14 production pipelines.

Data Analyst, Northbend Retail Group - Dallas, TX 2019 - 2021
- Owned the weekly merchandising dashboard used by 60 store managers.
- Migrated reporting from Excel to BigQuery and Looker.

Education
Master of Science, Information Systems
University of Texas at Austin, 2019
GPA 3.8/4.0

Bachelor of Science in Statistics
Texas A&M University, 2017

Selected Projects
Pipeline Observability Toolkit
A lightweight lineage tracker for Airflow DAGs. Technologies: Python, Airflow, Neo4j, FastAPI.

Open Data Austin
Volunteer project publishing cleaned city transit data as a public API. Technologies used: Python, PostgreSQL, Docker.

Certifications
Google Professional Data Engineer, 2022
dbt Analytics Engineering Certification, 2022

Interests
Trail running, amateur radio, teaching Python to career switchers.
